Bill of Materials

2008

Why you need this:

- You encounter raw materials shortages during production
- You have trouble scheduling production
- You need to plan cash flow for production
- You need to adjust production components for optimal profitability
- Your profit margins are cut by cost increases

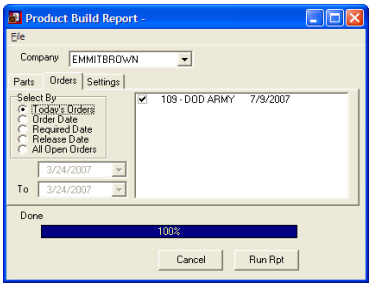
Better Manufacturing Inventory Management in Sage BusinessWorks

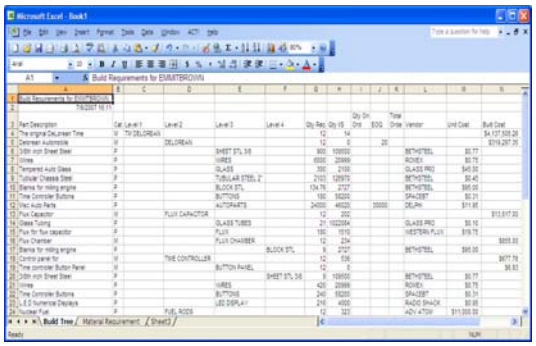
BSoft's Bill of Materials gives you the tools to manage your inventory effectively and efficiently.

You have just accepted a large order and need to know what raw materials you have/need to fill the order and how to schedule production. Run the Bill of Materials report for the selected order. There are several options for calculating required quantities, to guarantee that you are getting all of the information you need , the way you need it! The Bill of Materials Report will provide a detailed build tree with all the levels of the build and the required components for each level.

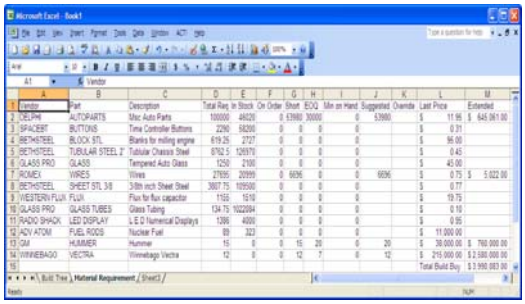


Your raw materials cost has just increased and you need to ensure that profit margins do not suffer. You have two options for addressing this dilemma; you can change the current vendor price in BusinessWorks or you can simply change the cost in the Bill of Materials spreadsheet (for this order), to compensate for the current price adjustment. The result will be an updated finished goods cost to use for accurate customer pricing.

What if...



Bill of Material has a special "live linkage" feature between the build tree and the materials requirement reports. This feature enables you to run "what if scenarios." A change entered on the Build Tree is carried over into the materials requirement instantly providing updated figures for the possible alternative. Instantly review all possibilities, the potential is endless!



CHALLENGE	SOLUTION	RESULTS
Effectively manage raw materials, schedule production, manage cash flow, and monitor profit margins.	Install BSoft's Bill of Materials	Reduction of material shortages, efficient re=pricing of finished goods, and reduction of calculation time for purchase requiremnts.
