

2008

Why you need this:

- Your recently built or received inventory requires labeling.
- You want things bar-coded for inventory or shipment tracking purposes.
- You need to label parts with their corresponding invoice number, order number, or purchase order number
- You need labels for shelves or bins.

Part Label Printer

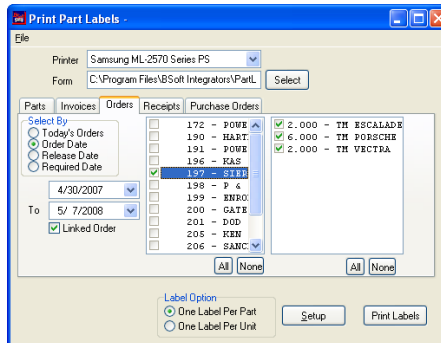

Better Part Identification and Management in Sage BusinessWorks

BSoft's Part Label Printer is the time saving tool for printing your part labels.

You just received a large inventory order that needs to be labeled appropriately! Open Part Label Printer, choose the receipts tab, select the appropriate PO receipt or build and then choose to print one

want, including bar-codes, through the use of BusinessWorks form editor. Part Label Printer uses the on hand to meet your part label needs.

You need to identify parts for a special order! Using Part

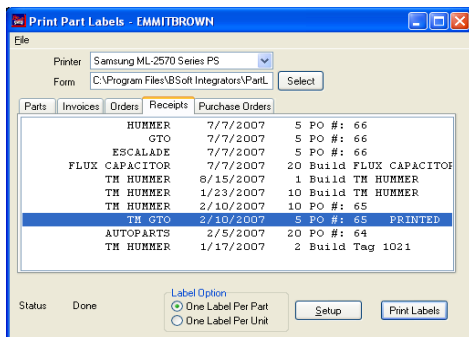

Label Printer's "link to" tool, you have capability to print part labels that include not only the standard data but also ; order number, invoice number, or purchase order number. Always

know where your parts belong! The selection process can be driven by hand choosing parts, selecting from Invoices, selecting from Sales orders, choosing receipts and even Purchase or-

ders (a great way to check your purchasing receiving!)

You are organizing your warehouse and need to label bins or shelves.

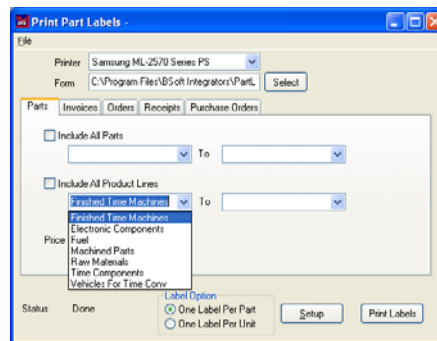

Using the parts tab, simply select the range of parts, or the specific parts you need labels for, and print. Yes, it really is that easy!

label per part or one label per unit. It is really that easy. Part Label Printer even notates the receipts for which labels have already been printed!

Need barcodes on labels for inventory or parts ?

know where your parts belong! The selection process can be driven by hand choosing parts, selecting from Invoices, selecting from Sales orders, choosing receipts and even Purchase or-
